Return to Learn From Cancer

The Superintendent or designee shall make available training approved by the chief medical officer of the State on how to recognize that students who have been treated for pediatric cancer and returned to school may need informal or formal accommodations, modifications of curriculum, and monitoring by medical or academic staff.

A 504 team meeting will be held, as appropriate, to develop individual return to learn accommodations and modifications.

Date of Adoption: October 12, 2015
